BOXXA™

LVL BOXING

Setting the standard in concrete boxing

Nelson Pine **BOXXA** is made from LVL (laminated veneer lumber) giving extra strength and stability to make boxing for formwork, precasting and everyday concrete projects easier, quicker and more economical.

- **Longer life than ordinary timber boxing**
- **Easier to handle, strong, straight and consistent**
- **Special painted surface for easier concrete release and moisture resistance**
- **Machined square edges for greater uniformity in screeding**
- **Specifically designed for precasting, formwork and everyday concrete boxing**

Sizes		
36mm x 150mm	6m lengths	32 pieces per pack
36mm x 200mm	6m lengths	24 pieces per pack

Nelson Pine Industries is one of Australasia's leading forest products companies.

175,000 hectares of sustainable radiata pine forests provide Nelson Pine Industries with the superior quality raw material needed to manufacture our product range.

Nelson Pine Industries' state of the art log peeling and veneer plant provides veneers as the base material for the manufacture of Laminated Veneer Lumber, which is carried out onsite utilising a continuous layup and press system to produce consistently high quality LVL.

The Nelson Pine plant on the shores of Tasman Bay

PAA JAS/ANZ Certified to the Australia/New Zealand standard AS/NZS 4357:1995 for Structural LVL.

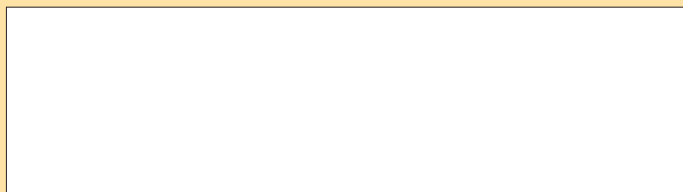

Environmentally friendly with ISO 14001 Environmental Certification.

Produced using state of the art technology, with scarfed veneer joints for greater strength and clean surface finish.

Readily available from approved distributors.
