

Environmental Management Policy

Nelson Pine Industries is committed to operate as a good corporate citizen

To achieve this we will:

1. Stick to the rules

This means we will: Comply with all relevant government and local body requirements and with other standards which we commit to.

2. Think ahead

This means we will: Foster continual improvement by annually establishing specific measurable objectives and targets.

Identify and manage environmental aspects of new plant, processes and products.

Seek opportunities to prevent and reduce pollution wherever practicable.

3. Check performance

This means we will: Regularly monitor and review our performance against legal requirements and in-house objectives and targets.

Take remedial action if required.

4. Involve the right people

This means we will: Foster positive attitudes to environmental issues within our staff and contractors.

Provide staff with the necessary training to perform their tasks to meet the required environmental outcomes and respond rapidly and appropriately to emergency situations.

Maintain dialogue with all the relevant interested parties.
