

# NelsonPine LVL P11: Span tables/charts

Lintels are beams contained with load bearing walls over windows or doors. They transfer the vertical loads applied over the opening to the jack studs on each side.

**BASIC LOADING DATA**  
 Wind Area = Very High  
 Snow Load, SG = 0.9kPa

Wind Design Strength Pressure = 1.5 kPa  
 Wind Serviceability Pressure = 1.1 kPa  
 Min. End Bearing Length = 35 mm  
 Service Class = Internal Protected

Uplift Fixings	
FIXING	CAPACITY
F	4.0 kN
G	7.5 kN
H	13.5 kN
SED	18.0 kN

**Lintels are not designed for wind-face loading**

NelsonPine LVL P11 is an H1.2 treated engineered wood product consisting of radiata pine veneers laminated together to produce structural products. Feedstock is structural 45mm NelsonPine LVL subsequently secondary bonded into thicker 90mm product using PUR adhesive.

Spans have been derived from Hyne Design Software. If you require additional span details or alternative configurations/solutions, please refer to the **Hyne Design Software** for comprehensive structural timber design information: <https://www.nelsonpine.co.nz/product/lvl-design-fool-hyne/>
